## PROFILE SUMMARY

I am a passionate and dedicated individual currently pursuing a course in UI/UX design, with a strong foundation in HTML and CSS. My goal is to enhance user experiences by creating intuitive and visually appealing interfaces. I have hands-on experience with front-end development, which allows me to bridge the gap between design and implementation.

## SKILLS

- User Research & Analysis – Understanding what users need and want by gathering feedback through surveys, interviews, or tests.
- Wireframing & Prototyping – Sketching and creating basic models of designs to visualize layout and functionality before finalizing.
- UI Design – Designing the look and feel of a product, focusing on elements like fonts, colors, and layouts for a visually pleasing interface.
- Information Architecture (IA) – Organizing content in a clear, logical way to help users easily navigate and find information.
- Responsive Design – Designing interfaces that work well on different devices, like phones, tablets, and computers.
- Interaction Design – Planning how users interact with the design, including buttons, animations, and overall experience.
- Usability Testing – Testing designs with real users to find any issues and improve the product.
- HTML & CSS Knowledge (Bonus) – Understanding basic coding helps communicate better with developers and ensure designs are practical to build
